## Name

**hvrstrip** - Purge HVR installation files.

## Synopsis

**hvrstrip** [*-options*]

## Description

Command **hvrstrip** allows you to purge HVR installation files. This command is used to remove either the old/unnecessary HVR files after [upgrading HVR](#) or the HVR installation files (on a remote server) that are not required for the HVR remote agent.

## Options

This section lists and describes all options available for **hvrstrip**.

Parameter	Description
<b>-p</b>	Displays the list of files that will be purged using option <b>-P</b> . This option cannot be used with options <b>-P</b> , and <b>-r</b> .
<b>-P</b>	Purge HVR installation files that not required after performing an HVR upgrade. The list of files that will be purged can be viewed using option <b>-p</b> . This option cannot be used with options <b>-p</b> , and <b>-r</b> .
<b>-r</b>	Purge all HVR installation files that are not required for the HVR remote agent. This option cannot be used with options <b>-p</b> , and <b>-P</b> .  This option should not be used on a server running HVR hub.
