

# Command Reference

This section lists the HVR commands with short description. For more details about a command, click on the command name.

Command	Description
<a href="#">hvr</a>	HVR runtime engine.
<a href="#">hvradapt</a>	Select base table definitions and compare with channel information.
<a href="#">hvincatalogcreate</a>	Create catalog tables in hub database.
<a href="#">hvincatalogdrop</a>	Drop catalog tables from hub database.
<a href="#">hvincatalogexport</a>	Export from hub database into HVR catalog document.
<a href="#">hvincatalogimport</a>	Import from HVR catalog document into hub database.
<a href="#">hvrcompare</a>	Compare data in tables.
<a href="#">hvrcontrol</a>	Send and manage internal control files.
<a href="#">hvreventtool</a>	Manage (add/edit/change state) events.
<a href="#">hvincrypt</a>	Encrypt passwords.
<a href="#">hvreventview</a>	Displays events and their results.
<a href="#">hvrfailover</a>	Failover between Business Continuity nodes using replication.
<a href="#">hvrffingerprint</a>	Display host fingerprint.
<a href="#">hvrgui</a>	HVR Graphical User Interface.
<a href="#">hvrinit</a>	Load a replication channel.
<a href="#">hvr livewallet</a>	Set passwords to the HVR Live Wallet port.
<a href="#">hvrlogrelease</a>	Manage DBMS logging files when not needed by log-based capture.
<a href="#">hvrmaint</a>	Housekeeping script for HVR on the hub machine.
<a href="#">hvrproxy</a>	HVR proxy.
<a href="#">hvrrefresh</a>	Refresh the contents of tables in the channel.
<a href="#">hvr remotelister</a>	HVR Remote Listener.
<a href="#">hvrretryfailed</a>	Retry changes saved in fail tables or directory due to integration errors.
<a href="#">hvrrouterconsolidate</a>	Merge small tx files in router directory.
<a href="#">hvrrouterview</a>	View or extract contents from internal router files.
<a href="#">hvrscheduler</a>	HVR Scheduler server.
<a href="#">hvrsslgen</a>	Generate a private key and public certificate pair.
<a href="#">hvrstart</a>	Start HVR jobs.
<a href="#">hvrstatistics</a>	Extract statistics from HVR scheduler log files.

<b>hvrstats</b>	Gather or output statistics information.
<b>hvrstrip</b>	Purge/remove HVR installation files.
<b>hvrsuspend</b>	Suspend (or unsuspend) HVR jobs.
<b>hvrswitchtable</b>	Schedule merge of one channel's tables into another channel without interrupting replication.
<b>hvrtestlistener</b>	Test listening on TCP/IP port for HVR remote connection.
<b>hvrtestlocation</b>	Test connection to HVR location.
<b>hvrtestscheduler</b>	Test (ping) that the HVR Scheduler is running.
<b>hvrvalidpw</b>	Authentication plugin to validate the username/password of incoming connections.
<b>hvrwalletconfig</b>	Configure HVR hub wallet.
<b>hvrwalletopen</b>	Open, close a hub encryption wallet and verify the wallet password.
