

Managing Consultant SAP Data Integration

Location: Amsterdam, Netherlands

About the role

HVR is looking for an experienced managing consultant to lead the business development of our real-time SAP Data Integration practice. You will evangelize the SAP Data Integration proposition, actively participate in sales opportunities, work with global technology partners and provide input and guidance to the SAP Data Integration product development.

Who we are

HVR is the leading independent provider of real-time data replication for heterogeneous environments. HVR is designed to move large volumes of data FAST, accurately and efficiently in complex environments.

Our software solution replicates data between over thirty different technologies and platforms that our customers use. Data is the lifeblood of a modern organization. Our technology enables organizations to unlock their data silos by replicating data in real-time, between a multitude of mostly database technologies, on-premises and in the cloud. Common use cases include data lakes, data warehouses, and reporting environments.

What you'll do

- Business development of the SAP Data Integration Solution in collaboration with marketing and sales
- Evangelize the SAP Data Integration Solution at customer talks, speaking at events and writing blog posts
- Collaborate with the leading technology vendors like AWS, Microsoft, Teradata, Snowflake, Talend, on defining and positioning of the SAP Data integration Solution
- Provide requirements and prioritization to engineering on product development

Who you are

- Ability to evangelize HVR's SAP Data Integration Solution guide further product development in collaboration with the engineering team
- Extensive experience in SAP related Business and Solution Development at large and mid-size enterprises
- Understand the customers SAP ERP business processes and related BI need
- Have extensive experience with SAP Data Integration and common Business Intelligence Solutions
- Extensive knowledge of databases
- Preferably experience with Log-Based Data Replication
